The professor will rejoice, for he now has a single, modern volume, well constructed and annotated, to aid him and the student.

The student will now more readily and easily appreciate the field of equity, for here he has a panoramic view of a difficult portion of the law. This in one comprehensive volume that will help him to comprehend.

LEN C. FONS

Cases on Mortgages. Am. Casebook Series; J. L. Parks.

With the growth of mortgage law in America, the law of mortgages was introduced into many of the legal curricula. Parks' book on mortgages is one of the latest and most modern treatments. After an intense study of this peculiar field, he has planned a casebook that not only gives the student a general knowledge of mortgages but also stresses the equitable and involved doctrines of priorities, assignment, subrogation, redemption, foreclosure and accounting. These topics are touchstones in mortgage law, and once they are clearly understood, an appreciation of mortgage law and the tendencies of the day on this road have been purely crystallized in the student's mind. The proportionate spacing given to these difficult portions, according to their importance, is the main asset of this new volume on mortgages.
